DR. Taherhe Mohammad

Introduction

Introduction

The study of the common cultures among countries and the use of them for the education of women and children

As it is cited in Wikipedia, culture has a single meaning in all countries. Culture is a logical and prevalent strategy for the solution of any real or unreal needs in a society. Culture is always like software and civilization which is a part of it is called hardware. So each society base on its own need has different cultures. But civilization is along the culture too. It means that there are many common cultures among countries because many years ago, this modern civilization hadn't plurality and nearly three great civilizations of all societies were under its control.

What is the definition of culture?

Culture contains, Art, Literature, science, creations, philosophy and religion. Indeed culture and art in all around the world have significant role because they are the sample of the culture of each society.

The global definition of literature and art

Certainly, literature belongs to politeness, all sciences and all literary works. Art in its lexical meaning means evolution and freedom.

Literature is a kind of art. Words and materials are substances that poet and writer with the use of his/her emotions and imaginary create a literary work.

Finally, the aims of culture and civilization are: To promote the level of the society and to create an ideal and calm life for people in the society and moreover, the existence of internet, technology and many other things among society's causes the educations very quickly transfer. All the human beings are interested in art and this is completely natural.

Woman for Earth, the Earth for children

When Man had a civilization for the supplying of real or unreal needs of his/her societies required creating a culture. This creation needs some tools such as storytelling and painting. In ancient period, when there weren't any languages for communicating, people by painting and drawing on rocks communicate to each other. Each of these paintings and events has its own story.

According to the researchers of universities, human beings have two inheritance agents in their DNA. One of them is physical and the other one is cultural.

Storytelling and painting through inheritance transmit to different societies. So we decide to publish a book "my story, your book and our book", which has special prosperities and consists of both painting and storytelling.

The Peace and Friendship Ambassador groups try to publish this book and by travelling to various countries to send the message of Peace and Friendship to people all around the world.

This group consists of children that with respect to all nations, telling the stories of "Shahnameh" by different languages and also with combination of *minstrelsy* which is the art of Iranian in telling the fiction stories, try to send the message of peace and friendship.

This group has gone to many countries and by the message of peace and friendship has made the people to become familiar with the Iranian stories and also this may causes to arouse the children of other countries do this work for their countries.

In our study we survey the international stories and translate our books in various languages and also translate their stories in Persian language. As Mr. Marzlf said in his research, there are countless numbers of stories in the world which have the same means and contents, but due to different conditions and situations or even political issues the characteristics of the stories were changed.

Woman for Earth, the Earth for children

One of the works of peace and friendship ambassador groups has been finding the common proverbs.

Another activity of this group is the collection of the all ancient and modern puppets of each country and trying to register them with the name of peace and friendship. The reason is that if in a country, based on any reasons (such as natural events, war and terrorism), something was happened, these puppets would send to their countries in order, not only help and conciliate them, but also ask help from the people of all the world for ceasing the war.

Hope we will be the witness of love with the thought of children, friendship with the speech of children and peace with children's deeds in all around the world.

and civilization of the women's
education*

The study of the indigenous culture and civilization of the women's education

From the beginning, human societies consist of common collective behavior Such as the culture of storytelling. Till now the history doesn't specified storytelling, belongs to which periods or nations. But this is definitely true that storytelling appeared after the language development. Also Iran because of its ancient civilization and cultural has a treasure of many literary stories. One of them is "Shahnameh" which is written by Abolghasem.Ferdowsi.

This book is divided into three parts: 1.myth 2.Athletic and historical. Ferdowsi tries to remind the human morality by the use of eloquent expression in each part. At the athletic parts, telling the story of Fereidoun that how was he able to resistance against the zahak's oppression. In this part, ferdowsi also gives a piece of advice about humanity and friendship.

In historical part, by telling the story of "Roustam" tries to show the history of Iran completely in a way that enables the readers to imagine the story completely. The famous war in this part is the war between 'Rostam' and 'sohrab'. Ferdowsi for the better perception of the story told a sad/tragic story and he showed the obscenity of war to the readers completely. If you have a look at "Shahnameh", you can find it very easily and clearly that Ferdowsi admires peace and friendship at every part.

These stories not only belong to Iran, but also belong to all worlds. With respect to all nations, we are telling these stories with different languages to all people because we believe culture doesn't have boundaries and also culture and civilization have the unique and common message in every nation.

Woman for Earth, the Earth for children

The peace and friendship ambassadors group with ancient stories sending the message of peace and friendship to all people. They believe the earth needs peace and this peace only attains through a friendly relationship. The peace and friendship ambassadors group also believe that peace and friendship is not the disarmament that is peace among humans. If we were friendship with our cultural boundaries, we would never think about going against the geographical borders.
